

Generative AI

Name: RAMANUJ SAKET

LinkedIn Profile: [LinkedIn](#)

Languages: Hindi (Mother Tongue), English (Fluent)

Mobile Number: +91-8349819726

Email ID: rmnjsaket4664@gamil.com

Current Location: Mandi, H.P. (175005), India.

Professional Synopsis:

- AI/ML Engineer with 4+ years of professional experience, including 3+ years specializing in Machine Learning, Generative AI, and Agentic AI systems.
- Skilled in designing, training, fine-tuning, and deploying production-ready ML and deep learning models using Python, TensorFlow, and PyTorch across cloud (AWS) and on-premises environments.
- Hands-on experience applying Generative AI models (Claude, Gemini, Mistral-7B, GPT-3.5-turbo) to build scalable Retrieval-Augmented Generation (RAG) pipelines, computer vision systems, and intelligent conversational agents.
- Strong track record of collaborating with cross-functional teams, mentoring junior engineers, and documenting technical processes to deliver reliable, high-performance AI solutions.
- Experienced in deploying and managing AI/ML workloads on cloud infrastructure including AWS Lightsail and EC2, as well as integrating AI model APIs from providers such as Cloudflare and RunPod.

Core Technical Skills:

- **Machine Learning & Deep Learning:** Supervised & Unsupervised Learning, Neural Networks, Feature Engineering (imputation, outlier handling, binning, normalization), Regularization (L1/L2), TensorFlow, PyTorch, Scikit-learn, XGBoost
- **Generative AI & Agentic AI:** Gemini, Claude, Mistral-7B, GPT-3.5-turbo, Retrieval-Augmented Generation (RAG), LangChain, Semantic Kernel, AutoGen, CrewAI, Prompt Engineering, Model Fine-Tuning (LoRA, QLoRA), N8N.
- **Cloud & MLOps:** AWS SageMaker, AWS Bedrock, EC2, Lightsail, Lambda, DynamoDB, S3, Rekognition, Textract, Cloudflare AI, RunPod, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD.
- **Computer Vision & NLP:** OpenCV, YOLOv8, DeepFace, MediaPipe, MTCNN, spaCy
- **Programming & Databases:** Python, MySQL, MongoDB, PostgreSQL, FAISS Vector DB
- **Data Analysis & Visualization:** Power BI, NumPy, Pandas, Matplotlib

Professional Experience:

Software Developer | IIT Mandi iHub & HCI Foundation

Mandi (H.P.) | August 2023 – Present

- Designed, trained, and deployed production-ready Machine Learning and Generative AI models, covering data preprocessing, model fine-tuning, and performance optimization.
- Built and integrated intelligent, agent-based AI systems using frameworks such as Semantic Kernel and AutoGen to automate complex workflows.
- Apply deep learning and computer vision techniques to deliver scalable, real-world AI solutions across healthcare, travel, and industrial domains.
- Collaborate with cross-functional teams and contribute to technical documentation to support knowledge sharing and reproducibility.

Software Engineer | HCL Technologies Ltd

Bangalore (Karnataka) | April 2022 – April 2023

- Designed, developed, and maintained Java-based applications and web services using Core Java and the Spring framework.
- Delivered customized software features aligned with client requirements, strengthening foundational skills in scalable, production-quality software engineering.

Summary of Industrial Projects:

- **Child Malnutrition Classification – Women Development and Child Welfare (Andhra Pradesh Govt) – AI/ML Developer**
Developed an offline, Android-based AI screening tool for Severe Acute Malnutrition (SAM) detection using 2D Geometric Morphometrics, enabling non-invasive, scalable field screening in low-resource environments.
Tech: Geometric Morphometrics, Linear Discriminant Analysis (LDA), tpsDig2, MorphoJ, Computer Vision.
- **AI-Agent Chatbot – LogisEye (Dubai) – AI/ML Developer**
Built a multilingual AI chatbot with a custom UI to handle freight queries, shipment tracking, pricing insights, and more. Integrated voice, WhatsApp/Teams, and external APIs.
Tech: ChromaDB, FireCrawl API, Symantic-Kernel, RAG(AWS Bedrock with Llama 3.1 405B)
- **ML & Computer Vision-based Yarn Inspection – Shingora Textiles (Ludhiana) – AI/ML Developer**
Developed a data/image collection pipeline and a real-time defect detection system for yarn using deep learning and computer vision.
Tech: OpenCV, YOLOv8 object detection model, Real-time AI/ML
- **AI Travel Trip Planner Assistant – AI/ML Developer**
Developed an agent-based travel assistant for personalized itineraries using conversational AI and real-time data.
Tech: Python, Semantic-Kernel, Amadeus API, AutoGen, FastAPI, LLM(AWS Bedrock), FAISS DB
- **Poshan App – Anganwadi Services – Backend Developer & DevOps**
Developed mobile and web apps for nutrition tracking and face recognition-based attendance system.
Tech: Python (Flask), AWS (DynamoDB, Rekognition)
- **Face Recognition for Furhat Social Robot – Event Check-ins – AI/ML Developer**
Developed a real-time face recognition system for the Furhat Social Robot to authenticate guest registrations, enabling seamless and efficient check-ins at events.
Tech: MTCNN, DeepFace, MediaPipe, OpenCV, Python.

Summary of Education:

- **Master's in AI (Artificial Intelligence) - Pursuing**
IIT Jodhpur | 2025 – 2027
- **B.E. (Bachelor of Engineering) in ECE(Electronic and Communication Engineering) |78.30%**
Malawa Institute of Science & Technology, Indore (MP) | 2019
- **Senior Secondary (12th) - MPC(Mathes, Physics, Chemistry) | 71.80%**
Govt Boys H.S. School, Deotalab, Rewa (MP) | 2014
- **Secondary (10th) - Science | 78.33%**
Govt Boys H.S. School, Deotalab, Rewa (MP) | 2012

Training & Certifications:

- **Hands-on Workshop on Generative AI Agents & Workflow Automation – IIT Madras, 7th & 14th June 2025**
- **Data Science Mentorship Program (DSMP) 2.0 – CampusX, May 2025**
- **Certificate in Python Programming with AI & ML – NIT Warangal, Oct 2021 – Nov 2021**
- **Certificate: Fundamentals of Artificial Intelligence – IIT Guwahati (NPTEL), July – October 2021 (12 weeks)**
